WORK EXPERIENCE

Wonder Word Solutions - Frontend Developer   Aug. 2022 - March 2024

- **Wealth words** - Redesign and development of a modern, responsive gaming web application using Angular and Bootstrap, ensuring a seamless user experience and enhanced performance across all platforms.
- Integrated RESTful APIs and added multiple new games with dynamic features. Additionally, implemented Google and Facebook login options to enhance user convenience and streamline the registration process.
-Achieved a 14% increase in user engagement within the first two weeks post-launch by introducing multiple new games. This led to higher user visits, longer play durations on the platform, and positive new reviews on Trustpilot.

- **Assistenzup :** Developed a German web application platform using Angular and Bootstrap to connect differently-abled students and teachers, facilitating seamless interaction and accessibility.
- Integrated both German and English languages into the application, ensuring a user-friendly UI/UX with enhanced accessibility. Developed reusable code blocks to streamline the development process.
- Designed a system to assign tasks to students based on their age group, ensuring tasks are age-appropriate and aligned with educational goals. Implemented weekly result tracking to monitor progress.

- **Popt :**Integrated React into a web application to facilitate the listing and management of properties for sale and purchase, enhancing user interaction and dynamic content rendering. .
- Integrated REST APIs into the application and actively participated in weekly sprints using Jira to improve project efficiency and deliver features on time.
- Added multiple mini-features to improve user experience, including property comparison, area-based sorting, and a "Find Property Near Me" function, facilitating easier and more intuitive property searches.

Aasnaa - (UI/UX Internship)   Oct. 2021 - Jul 2022

- **Aasnaa :** Designed and developed a comprehensive e-commerce website for product listings, focusing on user-friendly navigation, responsive design, and a seamless shopping experience.
- Implemented key marketing features including Mailchimp, Shiprocket, and Google Ads, leading to a 12% increase in sales and a reduced bounce rate on the site.

- **Mipie :** Developed a dynamic job portal using React and Bootstrap, incorporating Google Location Autocomplete for enhanced user experience and accurate job searches.
- Utilized the Razorpay gateway to enable secure and efficient payment processing, ensuring a reliable and streamlined transaction experience for users.
